With its unrivalled energy efficiency, all-encompassing range and built-in communication capabilities, MAGNA3 is ideal for engineers and specifiers looking to create high-performance heating and cooling systems.</p> <p data-bbox="199 947 1460 1025">The pump is maintenance-free due to the canned-rotor type design. This also means that pump and motor form an integral unit without shaft seal and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid.</p> <p data-bbox="199 1032 1412 1088">MAGNA3 features an intuitive display and allows you to connect wirelessly with the Grundfos GO Remote app, giving you access to advanced reporting and monitoring.</p> <p data-bbox="199 1095 1420 1151">The pump includes fieldbus communication via CIM modules as well analog and digital inputs and configurable relays.</p> <p data-bbox="199 1158 1452 1214">Control features include FLOWADAPT, which reduces the need for throttling valves, thus cutting costs on system components.</p> <p data-bbox="199 1220 1236 1247">MAGNA3 is the superior choice for a wide range of heating and cooling applications, including:</p> <ul data-bbox="199 1249 957 1384" style="list-style-type: none"> • Mixing loops Heating surfaces Air conditioning surfaces Ground-source heat pump systems Smaller chiller applications. <p data-bbox="199 1391 1436 1447">MAGNA3 is a single-phase pump and characterised by having the controller and control display integrated in the control box. The pump also has a built-in differential-pressure and temperature sensor.</p> <p data-bbox="199 1453 1436 1532">The pump housing is available in both cast-iron and stainless-steel versions. The composite rotor can be carbon-fibre reinforced, the bearing plate and rotor cladding are made of stainless steel and the stator housing is made of aluminium. The power electronics are air-cooled.</p> <p data-bbox="199 1538 1396 1617">MAGNA3 incorporates a 4-pole synchronous, permanent-magnet motor (PM motor). This motor type is characterised by higher efficiency than a conventional asynchronous squirrel-cage motor. The pump speed is controlled by an integrated frequency converter.</p> <p data-bbox="199 1624 311 1650">Features:</p> <ul data-bbox="199 1653 1444 2094" style="list-style-type: none"> • Vast communication options, including inputs, relays and fieldbus The most energy-efficient pump range within the industry Intelligent control functions Stainless-steel variant to accommodate domestic hot-water applications AutoAdapt FlowAdapt, which reduces the need for throttling valves, cutting costs on system components Proportional-pressure control Constant-pressure control Constant-temperature control Constant-flow control Differential-temperature control (requires an additional temperature sensor) Constant-curve duty Maximum and minimum curve duty Automatic night setback
